

For immediate general release

## **TOLVEN BETA 4 NOW AVAILABLE**

Tolven is pleased to announce the availability of **Tolven Beta 4**, which includes a number of platform and application enhancements.

- Software download available at [http://sourceforge.net/project/showfiles.php?group\\_id=169798](http://sourceforge.net/project/showfiles.php?group_id=169798)
- Enhancements to the installation processes
  - Installation now takes a matter of minutes - just use the enhanced installer and follow the documented installation process (see <http://tolven.org/doc/installation/index.html>)
  - Tolven Installation Control Panel provides a graphical user interface for configuration and installation management of Tolven
    - Template Reference Information Model (TRIM) Editor
    - Application Editor
    - Configuration Manager
  - Headless installation
- Incorporation of Jasper for the generation of reports and PDF documents
- Wizards that allow for entries of multiple instances of similar data for a given patient (e.g., diagnoses, allergies), consistent with common clinical workflow
- Dynamic wizards for care planning, including
  - Calendar and time line views of clinical activity
- Example language translations for the electronic Personal and Clinician Health Record applications
  - Arabic, traditional Chinese, Dutch, French, German, Hindi, Portuguese and Spanish
- Electronic digital signatures for documents
- Additional example portals, wizards and data views
- A number of features requested by customers and early adopters

Tolven Beta 4 will be the base code used in the first production installation of Tolven-based solutions. Contact [info@tolvenhealth.com](mailto:info@tolvenhealth.com) for further information.
